

Dual Degree

Dual Degree

We will be able to offer a dual degree programme to our best students.

Details about the application process and the procedures, as well as an introductory presentation, will be given during your first semester in Schmalkalden.

We have dual degree agreements which will give you access to an MBA degree at different leading business schools in the United States, and to a Master of Science degree at a superior university in Canada.

As a student of the University of Applied Sciences Schmalkalden you will be exempted from tuition fees in the US. Coordinated curriculums at both universities allow you to complete both programmes without loss of time.
